# I can't see the material sent by the instructor on my Jupyter Hub.

You can **restart your server** (see instructions below), and if it still does not appear, message the instructor on Slack.

I want to start my assignment again and get rid of <mark>ALL my changes.</mark>
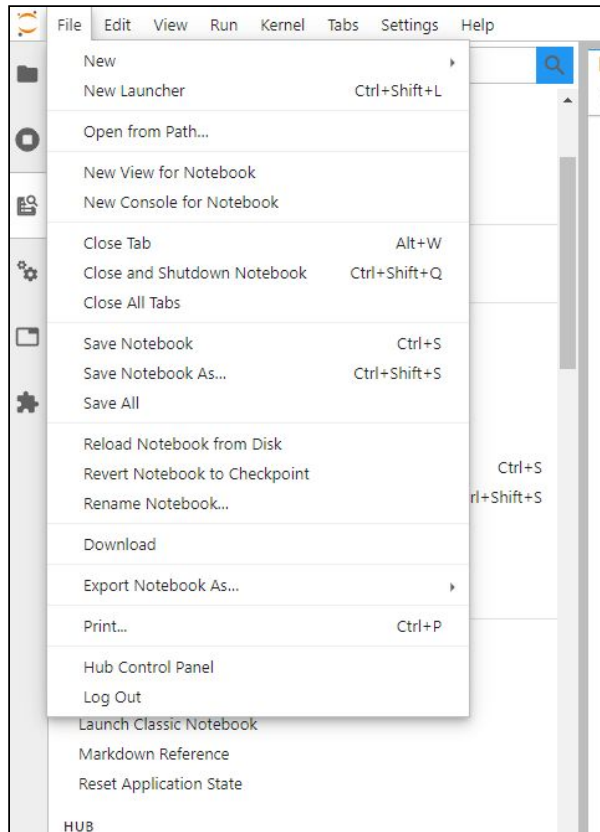

Assuming you are working on the assignment distributed by the instructor. You can delete the assignment file (right-click on assignment/delete - see figure below), and restart your server. This should repopulate your folder with the original copy of the assignment. **IMPORTANT:** By deleting your copy of the assignment <mark>you will lose all your changes</mark>, so if you want to save any changes made you should make a copy of the modified version, or download it for later reference.

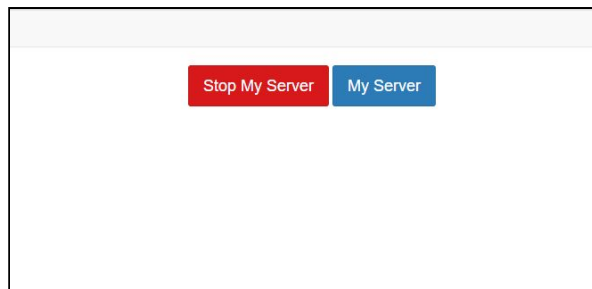

How to restart your server

File menu/Hub Control Panel

"Stop my Server"

"Start my Server" / "Launch Server" / Select our class / "Start"
